

# Accompanying Interpreting for Child care by FResHU supporters

Support Office for Female Researchers dispatches accompanying interpreters (called FResHU supporters) to day-care centers/hoikuens and health centers for helping the child care for foreign researchers and international students. If you have some planned interviews at health centers or in-house meetings at day-care centers/hoikuens with teachers and staffs, then we will find you a FResHU supporter who could accompany you and give you a helping hand for the procedures, such as; fill out the forms and interpret during the interviews and in-house meetings.

If both categories (1.& 2.) indicated the following apply to you, you can request the interpreting service:

1. You are a female researcher/international student of Hokkaido University
2. You want to go to a health center to apply for your child's admission to a day-care center/hoikuen or you have an in-house meeting planned with day-care center

#### Notes:

- As of 2016, we can provide interpreters for English, Chinese, Thai and Laos.
- It may take several days to assign an interpreter, so please request for this support service at least 1 week before the date of the interpreter is needed.
- We cannot provide you interpreting service for day-to-day matters.
